No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 89

NUMBER 1, AUGUST 15, 1978

NOTICE v

MANIE K. STANFIELD, BRIAN T. BUTCHER, AND GORDON T. STEWART. Spectroscopic Analysis of Polymers of Benzylpenicillin and Ampicillin 1

HUGUETTE ROUX MURTHY, PAUL-J. LUPIEN, AND SITAL MOORJANI. A Method for Rapid Microassay of 3-Hydroxy-3-Methylglutaryl-CoA Reductase Activity 14

JEAN-LUC BUTOUR AND JEAN-PIERRE MACQUET. Platinum Determination in DNA-Platinum Complexes by Fluorescence Spectrophotometry 22

G. M. OOSTA, N. S. MATHEWSON, AND G. N. CATRAVAS. Optimization of Folin-Ciocalteu Reagent Concentration in an Automated Lowry Protein Assay 31

PATRICIA S. THOMAS AND MARGARET N. FARQUHAR. Specific Measurement of DNA in Nuclei and Nucleic Acids Using Diaminobenzoic Acid 35

ELLSON Y. CHEN AND BRUCE A. ROE. The Application of PEI-Cellulose Thin-Layer Chromatography for the Resolution of Large Oligonucleotide Fragments of Transfer Ribonucleic Acids 45

A. GÖRG, W. POSTEL, AND R. WESTERMEIER. Ultrathin-Layer Isoelectric Focusing in Polyacrylamide Gels on Cellophane 60

TAKESHI FUKUSHIMA, KEN-ICHIRO KOBAYASHI, ISAO ETO, AND TETSUO SHIOTA. A Differential Microdetermination for the Various Forms of Biopterin 71

S. RICHARD GOODALL AND FLOYD M. BYERS. Automated Micro Method for Enzymatic L(+) and D(−) Lactic Acid Determinations in Biological Fluids Containing Cellular Extracts 80

ALFRED H. MERRILL AND DONALD B. MCCORMICK. Flavin Affinity Chromatography: General Methods for Purification of Proteins that Bind Riboflavin 87

JASON C. H. SHIH. Radial Diffusion Assay of Lipoamide Dehydrogenase and Its Use to Assess Riboflavin Deficiency 103

MILAN TOMANA, WILLIAM NIEDERMEIER, AND COOPER SPIVEY. Microdetermination of Monosaccharides in Glycoproteins by Gas-Liquid Chromatography 110

MAGGIE M.-Y. CHI, CHARLES V. LOWRY, AND OLIVER H. LOWRY. An Improved Enzymatic Cycle for Nicotinamide-Adenine Dinucleotide Phosphate 119

FRANCIS H. KIRKPATRICK AND DONALD J. ROSE. Crossed Immunoelectrophoresis from Sodium Dodecyl Sulfate-Polyacrylamide Gels into Antibody-Containing Agarose: An Improved Method for Evaluation of the Number of Immunochemical Determinants in Polypeptides, with Reference to Spectrin 130

HOW-MING LEE AND JAMES F. RIORDAN. Solid-Phase Edman Degradation: A New Method for Attaching Peptides to Insoluble Resins Using Trifluoroacetic Anhydride 136

TAKASHI YAMAUCHI AND HITOSHI FUJISAWA. A Simple and Sensitive Fluorometric Assay for Tyrosine Hydroxylase 143

LEO R. PUCACCO AND NORMAN W. CARTER. A Submicrometer Glass-Membrane pH Microelectrode 151

RUTH E. BENESCH, ROHINTON EDALJI, SUZANNA KWONG, AND REINHOLD BENESCH. Oxygen Affinity as an Index of Hemoglobin S Polymerization: A New Micromethod 162

W. J. BRUYNINCKX, S. GUTTERIDGE, AND H. S. MASON. Detection of Copper on Polyacrylamide Gels 174

SIDNEY PESTKA AND DANIEL LUK. Pseudoisokinetic Analytical Ultracentrifugation: Monitoring of Bands at a Fixed Region in the Analytical Ultracentrifuge 178

Sharon Quittner, Laurel A. Watts, and Robert Roxby. Molecular Properties of the *Busycon* Hemocyanin-SDS Complex with Reference to Its Usefulness as a High Molecular Weight Standard 187
Samuel Gallant, Sally M. Bruckheimer, and Alexander C. Brownie. The Use of High-Pressure Liquid Chromatography in the Simultaneous Assay of 11β-Hydroxylase and 18-Hydroxylase in Zona Fasciculata-Reticularis Tissue of the Rat Adrenal Cortex 196
W. S. Hancock, C. A. Bishop, R. L. Prestidge, and M. T. W. Hearn. The Use of High Pressure Liquid Chromatography (hplc) for Peptice Mapping of Proteins IV 203
Ian A. Sutherland, Jeremy S. Lee, and Denis J. Gauvreau. Separation of Quinoxaline Antibiotics by Coil Planet Centrifugation 213
Chih-Cheng Wang, Rupert E. Hodges, Jr., and Donald L. Hill. Colorimetric Determination of All-*Trans*-Retinoic Acid and 13 *Cis*-Retinoic Acid 220
Richard I. Christopherson, Takao Matsuura, and Mary Ellen Jones. Radioassay of Dihydroorotase Utilizing Ion-Exchange Chromatography 225
Yasuo Endo. A Simple and Sensitive Method of Analysis for Histamine, Putrescine, and Polyamines without the Use of an Amino Acid Analyzer 235
William M. Bonner and John D. Stedman. Efficient Fluorography of ^{3}H and ^{14}C on Thin Layers 247
A. Prakash, S. Roffman, and L. M. Greenbaum. The Differentiation of Fluorescamine-Modified Kinins by Gel Electrophoresis 257
Asim Esen. A Simple Method for Quantitative, Semiquantitative, and Qualitative Assay of Protein 264
G. D. Virca, J. Travis, P. K. Hall, and R. C. Roberts. Purification of Human α-2-Macroglobulin by Chromatography on Cibacron Blue Sepharose 274

Short Communications

Leon Hunter. Equilibrium Isoelectric Focussing in Acrylamide Gel Slabs—Reduction of Cathodic Drift 279
Ajay K. Bose, Hideji Fujiwara, Birendra N. Pramanik, Eric Lazaro, and Charles R. Spillert. Some Aspects of Chemical Ionization Mass Spectroscopy Using Ammonia as Reagent Gas: A Valuable Technique for Biomedical and Natural Products Studies 284
Masaru Imada. A New Design of Gel Electrophoresis Glass Plates for Two-Dimensional Analysis of Proteins 292
C. L. Penney and Gordon Bolger. A Simple Microassay for Inorganic Phosphate, II 297
Ian Simpson. Labeling of Small Molecules with Fluorescein 304
Ilkka Kouvonen, Kim Pettersson, and Timo Lövgren. Amido Black 10 B-Stained Bovine Serum Albumin (BSA) in Density Gradient Centrifugation 306

Number 2, September 1978

Notice v

SHORT COMMUNICATIONS

BETTY CHEN, ANN GRIFFITH, NICHOLAS CATSIMPOOLAS, ANDREAS CHRAMBACH, AND DAVID RODBARD. Bandwidth: Comparison between Continuous and Multiphasic Zone Electrophoresis 609
STEFANO BIAGIONI, RAFFAELLO SISTO, ANNA FERRARO, PAOLA CAIAFA, AND CARLO TURANO. A New Method for the Preparation of DNA–Cellulose 616
AUTHOR INDEX FOR VOLUME 89 620

The Subject Index for Volume 89 will appear in the December 1978 issue as part of a cumulative index for the year 1978.

INFORMATION FOR AUTHORS

Analytical Biochemistry will publish articles on methods of interest to the biochemical sciences and all fields that impinge on biochemical investigation, including those areas of immunology that include analytical and preparative methods for application by biochemists, cell and tissue culture techniques, and purification methods for specific enzymes and other proteins when such work has resulted in a high level of purity. Areas such as methods for sequencing and synthesizing DNA and RNA will be included. Invited review articles dealing with timely topics in methodology will also be published. In addition, a new book reviews section, covering titles directly related to the scope of the Journal and, specifically, to analytical and preparative methods in biochemistry and such impinging fields as immunology and tissue culture, will soon appear.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about 8½ × 11 inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introductory statement (no heading), Methods, Results, Discussion, Acknowledgments, and References.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the *Archives of Biochemistry and Biophysics* Information for Authors, appearing in the January issues of that journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is 8½ × 11 inches (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at bottom of page containing table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* **142,** 363–370.
2. Gottschalk, A. (1960) *in* The Enzymes (Boyer, R. D., Lardy, H. A., and Myrback, K., eds.), 2nd ed., Vol. 2, pp. 461–467, Academic Press, New York.
3. Meister, A. (1957) The Biochemistry of Amino Acids, p. 298, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge.
